Training packages for network professionals

offering network peace of mind

L3n Training Services

Stay current

In a constantly changing environment, maintaining and developing knowledge levels is never easy. The daily demands placed on network professionals make this process harder still; and falling behind is undesirable for both the company and the individual.

L3n can provide a range of cost effective training modules, delivered by our highly experienced Cisco certified engineers.

Generic and tailored courses

L3n have provided both generic training modules, designed to enable a thorough understanding of a particular technology or architecture, and bespoke packages designed with you to address a specific requirement.

In either case we would be very happy to deliver the training either at our premises in Cambridge or at your offices (or another specified site).

Course content

L3n have delivered generic and tailored packages covering the following :-

- Basic data networking
- TCP/IP
- Routing and routing protocols
 - ◆ RIP, OSPF, BGP
- IP Telephony
- Cisco CCNA primers
 - ◆ Campus networking
 - ◆ VLAN's
 - ◆ Layer 2 switching

Why L3n ?

L3n have over 60 years experience in the design, delivery and management of IP solutions and networks. The team has delivered solutions from simple, single site corporate networks, to complex nationwide network solutions for major ISP's.

L3n understands the requirements of SMB's to achieve a very short term return on investment, and that these savings must be made with minimal impact on business processes.

Providing a working solution is just the start. L3n can also provide a range of training, monitoring, management and reporting packages.

At L3n we take time to understand your business needs, providing a solution that will scale with your business. This approach results in fast ROI, and network peace of mind for you.
